

Antec

updates

effective February 1980
on all models

- New screen head design (J): double acting spring system allows screen to remain fixed in down position for two handed printing
- steel "T" and hard roller bearings offer precise registration (C)
- removable tensioning device (B)
- two operators can print simultaneously
- ball handles on platens (G) allow printer to rotate stations without touching shirt

**NEW: ask about our
bench mount nylon
jacket printer**
